DETAILED ACTION

Claim Objections

Claims 1-9, 23-26 are objected to because of the following informalities: correct the subject matter “acts of” to –steps of— in claim 1 and 29; and the subject matter “act of” to –step of—in claim claims 2-9, and 24-26. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 19-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-9, and 19-26, the claimed subject matter “substantially” is vague and indefinite since it is not clear the metes and bounds of the claimed subject matter.

Allowable Subject Matter

Claims 1-9, 19-26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2661

Claims 1-26 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including a master controller coupled to said memory, said master controller for processing a previous frame signal, wherein said previous frame signal is stored in memory during reception of a previous frame; said master further for using a previous frame signaling information, wherein said previous frame signaling information extracted during reception of said previous frame, to determine if processing said previous frame signal is required, as specified in claims 1, 10, 19, and 23 .
